# Butler Breeder's Invitational

## Registered Texas Longhorn Cattle

August 31, 2024

Dear Texas Longhorn Breeders,

Welcome to the 2024 Butler Breeder's Invitational, and our 27th Annual Sale. Each year, the Butler Breeder's Invitational is committed to offering not only the finest in straight Butler cattle, but the finest in Texas Longhorns as well. This commitment is shared by our consignors, and we are proud to be associated with them. We encourage you to contact them if you desire additional information on any of the sale lots. As Butler Texas Longhorn breeders, our commitment is two-fold. To the cattle, our commitment is to preserve and promote them to the best of our ability. To the people, it is to treat everyone with respect and welcome you as a guest in our own home.

Our sale offering includes something for everyone. This year will feature a nice selection of heifers that are extremely high quality with unlimited potential, as well as proven producers that can make a positive impact on any program. Whether your interest is in the history of the bloodline and the continuation of the last viable pure family of Texas Longhorns that still survives or adding Butler genetics to blend programs as the essential key ingredient for superior results, top breeders have long recognized that the best Texas Longhorns in the industry all have one thing in common: Butler Genetics.

Internet bidding will be available for those unable to attend the sale. The sale will be webcast by [www.HiredHandLiveBidding.com](http://www.HiredHandLiveBidding.com). There will be bidding on the webcast. If you are interested in using this service, please visit the Hired Hand Live Bidding website for more information.

We invite you to return with us to Lockhart for the great cattle and fun times the Butler Breeder's Invitational has come to represent. As always, for everyone associated with the Butler Breeder's Invitational, we thank you for your interest and your participation!

Kaso Kety

# FC Magic Tumbler

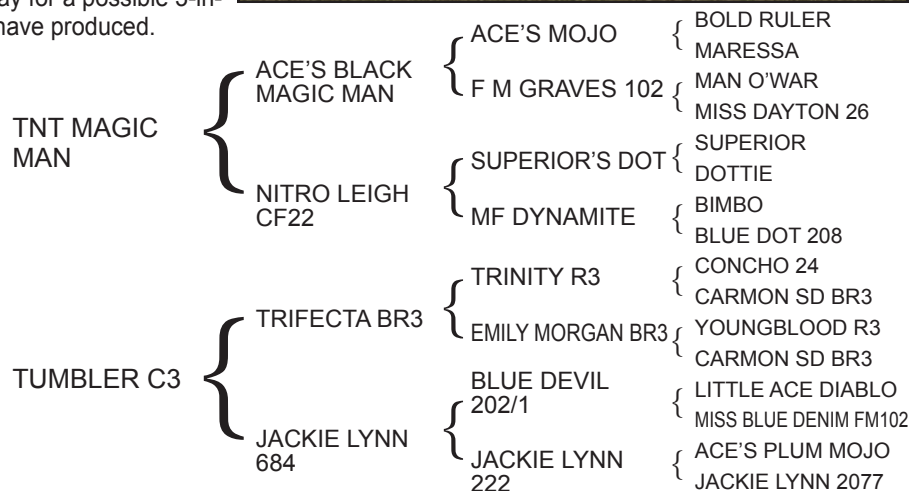

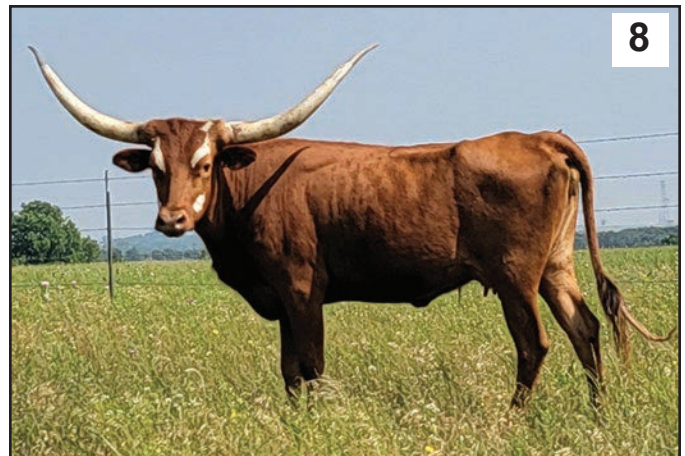

Consignor: Falls Creek Longhorns - Stan & Sandi Tidwell

PH No. 122 TLBAA No. CI348384 Born: 4/20/21  
 Color: Red with mottled face  
 Bangs Vaccinated (OCV): Y  
 Breeding Information: Steer calf at side born 3/28/24 by FA Super Star. Exposed to FA Super Star from 5/27/24 to 8/15/24.

COMMENTS: This great young female's pedigree on the top side combines the great foundation genetics of Ace's Black Magic Man (Ace's Mojo x FM Graves 102) with the genetics of the legendary TNT cow. You will not find very many cows with 102 and Mojo this close up in the pedigree now days. This is a rare offering. The bottom half of the pedigree brings genetics from the great breeding programs of McLeod and Richey. She has a steer calf at side by FA Super Star and is exposed back the same way for a possible 3-in-1 package. Super Star calves are some of the best we have produced.

She has great body depth, clean underline and perfect topline. We are proud to offer this smooth correct heifer. She is sired by WA Griffon, making her a half sister to the 2023 Futurity Reserve Grand Champion heifer, WA Adelita. She may look like a plain red heifer but she is developing brindling on her face and body. Her pedigree stacks many iconic Butler greats, BL Rose Bud, Annabella BR3, Ace's MS Dayton J, Coach, Farlap Chex. Her disposition is calm, making her easy to work.  Bangs Vaccinated (OCV): Y  
 Breeding Information: Exposed to Spanish Santa Fe MC 85 from 4/27/24 to 8/30/24.

COMMENTS: Hard to fault this outstanding youngster who comes from the heart of the McLeod program. She is the knockout first calf from my 'Birthday cow' Jackie Lynn 4351. Bonnie has a lot of eye appeal, she is smooth, correct, colorful and has a ton of early horn. Our limited herd size and focus on tight twist is your gain. We are reluctant to part with Bonnie, but JL 4351 has already given us a 2024 heifer displaying the hooked back horn set we love so much. # WA Ethel

Consignor: Cloakey/McLeod Partnership - James & Helen Cloakey / Michael & Jackie McLeod

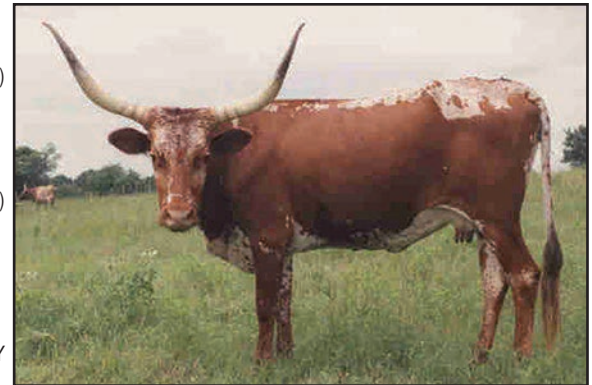

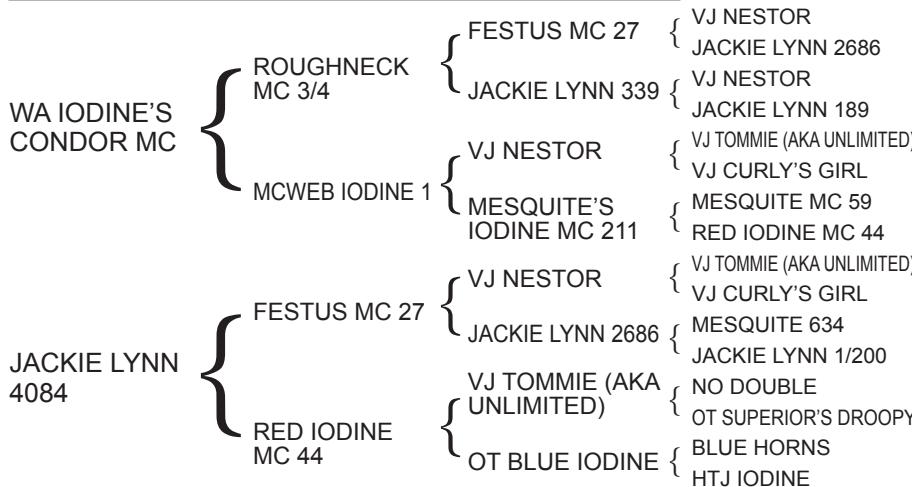

PH No. 72 TLBAA No. C342335 Born: 11/15/22

Color: White body with red speckled flanks, red ears and red legs

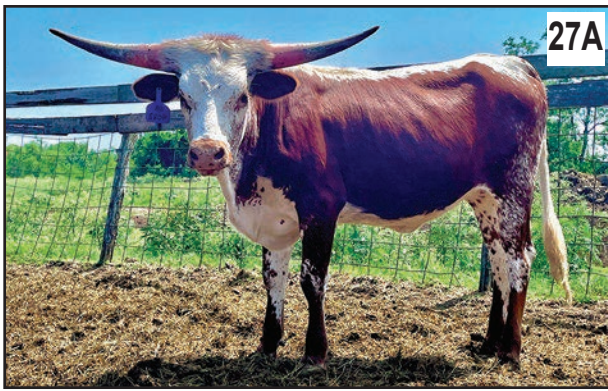

Bangs Vaccinated (OCV): Y

Breeding Information: Not exposed.

COMMENTS: A unique offering from the highly successful 'Iodine' family. The 'Iodine' influence has endured 30 years and has injected magic into the herds of Meshell Farms, V&J Webb, McLeod and Wynfaul Acres. WA Ethel is a daughter of WA Iodine's Condor MC and her dam is the last Red Iodine daughter, Jackie Lynn 4084. Her old school pedigree brings the Iodine magic top and bottom but also stacks Butler legends VJ Tommie, VJ Nestor and Festus MC. Ethel is petite and very feminine, at 18 months, she measures 44.75" at the hip. She is blossoming into a real beauty, developing more flea bitten roan in her coat as she matures. Her attractive high horn set has all the indicators for roll over and twist. She has an extremely quiet disposition and is easy to work. Ethel is unexposed and we feel she could benefit either a miniature or standard herd. We are fortunate to own her full sister and the Iodine influence will live on.

 Color: Red  
 Bangs Vaccinated (OCV): Y  
 Breeding Information: Exposed to FA Super Star from 5/27/24 to 8/15/24.

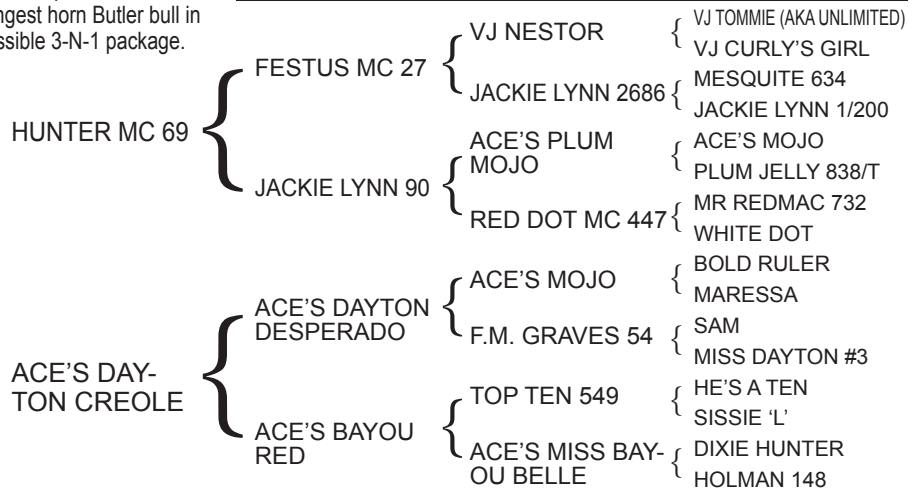

COMMENTS: A lot of breeders already know this great cow. This is a hard cow to let go of but she has served our program well. She is not only a beautiful eye catching cow, but she is a proven producer with a solid pedigree. She is a past high-selling lot at this sale and is the dam of a daughter that was a high-selling lot at this sale as well. Her sire is the great Hunter MC 69, whose production has been phenomenal. Her dam is a daughter of the legendary sire, Ace's Dayton Desperado who produced a number of great daughters and the top sire for the Richey's, R3 Dylan. You would be hard pressed to find a better female to add to your herd. The added bonus is she will sell with a calf at side by FA Super Star, one of the longest horn Butler bulls in the breed today. He is the sire of the longest horn Butler bull in the breed. Strawberry will be exposed back the same way for a possible 3-N-1 package.

This is a combination of great genetics you don't find often. She has a steer calf at side by the 80 inch plus sire, FA Super Star that we co-own with Frank Anderson. # *Pure Butler Texas Longhorn*

A pure Butler Texas Longhorn is a longhorn whose genetics trace back to only cattle originating in the herd of Mr. Milby Butler. This is a very simple statement to make but determining which cattle do indeed trace fully to the Butler herd has been far more complicated.

There are seven accepted subfamilies within the Butler bloodline. They are the herds of the Partlow family, F.M. Blackie Graves, the Meshell family, Ruel Sanders, Luman Holman, Forrest Lepper, and Virgil Shinn. Over the years all of these herds, except those of Lepper and Shinn, contained longhorns of non-Butler breeding in addition to their straight Butler animals. There are also Butler cattle which do not fall into these subfamilies. These would be found in herds such as J.W. Isaacs, the Wright family, and Pauline Russell. There also existed a group of animals which lived within these subfamilies and throughout the breed that were claimed to be straight Butler but which, as a result of paperwork mistakes, carried pedigrees that did not reflect their true genetic heritage. To determine which cattle did or did not trace fully to the original Butler herd, extensive and exhaustive research was done. Countless numbers of conversations and interviews with scores of people were conducted. Thousands of photos were viewed or taken. Pedigrees, personal notes, and records were examined. We saw everyone and everything that had a connection to Butler cattle. We heard facts, legends, lore,

lies, theories, rumors, secrets, innuendo, and accusations. We have the testimony of the men that registered these cattle. It was concluded that there were in fact quite a few that were unquestionably straight Butler, many of which were some of Milby's very best. If they were truly 100% Butler, shouldn't they too be included in the bloodline? We said yes. In the end, one factor alone guaranteed acceptance as straight Butler: the brands. Unlike paperwork, which becomes separated from the animal, brands stay with the animal for life. And as any good cowman knows, brands tell a cow's life story. If the brands identified it as Butler, then it was Butler. A Butler brand verified its true ancestry and simply reflected mistakes made at the time of registration, usually when the cattle were already mature. Anyone understanding the pitfalls and limitations of beginning a registry for a breed as diverse and old as the Texas longhorn can see how a breed that historically had survived for so long on their own, would have a family tree that would be hard to recreate and document. Many cattle regrettably were rejected because they did not have the proper brands to serve as irrefutable proof. What remains is a group of cattle which we can stand behind and know in our hearts are among the purest Butler Longhorns available.

Some would ask who are we to make such decisions and what gives us the right to do so. No one gave us the right; we stepped up and seized it. We are the Butler Breeders. We have always been

Butler breeders. We bred and promoted straight Butler cattle while Texas Longhorn industry psychics and consultants predicted that pure Butler cattle were a fad that would not last; that was in the 1980's. We're still raising pure Butler cattle. We did the research and we did our homework. Your sale hosts alone have over 75 years of commitment to this bloodline. Along with the help of other Butler breeders respected for their dedication to and knowledge of this bloodline, the Butler Breeder's Invitational screening committee pledges to offer only the best representatives possible. This includes the rejection of animals that do not conform to the genetic and phenotypic criteria required. Simply having papers that reflect a straight Butler pedigree does not guarantee acceptance to this sale. Unfortunately, breeders that disagree with our standards may suggest impure motivation on our part. But for us, this is about the cattle, not about people. Our goal is to raise the finest, 100% genetically pure Butler Texas Longhorns possible so as to preserve this magnificent bloodline for the future. Butler cattle have been our love and our lives. We hope Mr. Butler would be proud.
